SUMMARY

Final-year Artificial Intelligence and Machine Learning engineering student with hands-on experience in Python, Machine Learning, Deep Learning, and AI application development. Skilled in data preprocessing, model training, evaluation, NLP, Generative AI, and building end-to-end AI applications. Passionate about solving real-world problems through practical AI/ML solutions.

TECHNICAL SKILLS

Programming Languages: Python, Java, C

AI/ML: Machine Learning, Deep Learning, Natural Language Processing, Computer Vision, Generative AI, LLMs, RAG, Agentic AI

Libraries & Frameworks: NumPy, Pandas, Scikit-learn, PyTorch, OpenCV, Transformers, Flask, FastAPI, LangChain, LangGraph

Databases: MySQL, MongoDB, PostgreSQL, ChromaDB

Tools & Technologies: Git, GitHub, Docker, AWS, Render, Jupyter Notebook, Google Colab, VS Code, Postman

Core Subjects: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks

Competitive Programming: Regular practice on CodeChef, LeetCode, GeeksforGeeks, and HackerRank (Java, Python)

PROJECTS

Multi-Agent AI Research Assistant

Jul 2026

Python, FastAPI, LangChain, Grok API, DuckDuckGo, BeautifulSoup, Render

[Live Demo](#) - [GitHub](#)

- Developed a multi-agent AI research assistant using LangChain and FastAPI to automate information retrieval and structured research report generation.
- Integrated Grok API, DuckDuckGo Search, and BeautifulSoup for web search and content extraction; deployed the application on Render.

MedAgentix AI – Multi-Agent Clinical Decision Support System

Present

Python, FastAPI, LangGraph, LangChain, LLMs, RAG, NLP, ChromaDB, Docker, AWS

[Live Demo](#) - [GitHub](#)

- Developed a multi-agent Clinical Decision Support System using LangGraph, LLMs, and FastAPI for symptom analysis and clinical decision support.
- Implemented RAG with ChromaDB for context-aware medical recommendations and containerized the application using Docker for AWS deployment.

DataLab AI – End-to-End Data Science Workspace

2026

React, Vite, FastAPI, SQLAlchemy, PostgreSQL, Scikit-learn, JWT, Docker, AWS

[Live Demo](#) - [GitHub](#)

- Built a full-stack data science workspace supporting dataset upload, preprocessing, EDA, and classification, regression, and clustering workflows.
- Implemented experiment tracking, model versioning, JWT authentication, PostgreSQL integration, Docker containerization, and AWS deployment.

FlowNest – Full-Stack Smart Productivity Platform

2026

Flask, React, PostgreSQL, JWT, REST API, Render

[Live Demo](#) - [GitHub](#)

- Built a full-stack productivity platform with task management, scheduling, and progress tracking using Flask REST APIs and React.
- Implemented JWT-based authentication and PostgreSQL integration, and deployed the application on Render.

EXPERIENCE & TRAINING

CICD Prosystem – Summer Intern

Jun 2026 – Aug 2026

Worked on business problem identification and research, followed by end-to-end implementation of the proposed solution under professional mentorship.

Infosys Springboard: Pragati – Path to Future Cohort 5

Apr 2025 – Jul 2025

Learned and implemented AI/ML concepts through guided projects, technical activities, and mentorship.

Technical Exposure & Participation: Attended Mumbai Tech Week at Jio World Convention Centre and participated in 5+ national-level hackathons focused on real-world problem solving.

EDUCATION

B.Tech in Artificial Intelligence & Machine Learning

2023 – 2027

R. C. Patel Institute of Technology, Shirpur

CGPA: 9.25 / 10 (5th Semester)

ACHIEVEMENTS & ACTIVITIES

- Qualified **GATE DA 2026** with AIR 10584; selected for **ISF Unicorn Summit, Dubai**.
- Co-Head, Data Polaris Club**; Member, **Editorial and Magazine Committee** (AIML Department).
- Certifications:** NPTEL – Introduction to Machine Learning; Introduction to Large Language Models; Infosys Springboard – Natural Language Processing.
